DETAILED ACTION

1. Receipt is acknowledged of the amendment filed on May 2, 2006, which has been fully considered in this action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Klein.

Klein discloses a valve for controlling fluid flow comprising all the featured elements of the instant invention, note specifically inlet duct 14; outlet duct 16; seat provided by seating ring 1 angularly oriented; a pressure chamber above 17; closure member 8 with seat engaging surface, see Fig.1 and is pivotable about 18; a diaphragm 6 which transfers pressure from the pressure chamber onto the closure member, see col. 4, lines 39-52.

As to claims 2 and 3, note col. 6, line 68 thru col. 7, line 2.

Allowable Subject Matter

4. Claims 16-18, 23, 24, 26-36 and 38-40 are allowed.

5. Claims 6, 7, 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments, see page 12, line 4 through page 15, line 8, filed Ma 2, 2006, with respect to the rejection(s) of claim(s) 1-4 under 35 U.S.C. 102(e) and 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the newly found prior art reference, Klein. The rejection of claims 1-5 has been discussed above in paragraph 3.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tyden, Griffith '467, Herkimer, Griffith '474 and Merdinyan show various types of valves for sprinkler systems.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Ganey whose telephone number is 571-272-4899. The examiner can normally be reached on 7:00-5:00; M, Tu, W and Th.
